PROFESSIONAL SUMMARY

Senior Frontend Lead with 8+ years building and scaling production web and mobile applications in React.js, TypeScript, and React Native. Currently lead a team of 3 engineers, owning frontend architecture, code quality, and delivery for a commercial API platform. Deep expertise in component-driven architecture, state management, performance optimization, and design-system consistency, backed by full-stack fluency across Node.js, GraphQL, and Ruby on Rails. Proven at mentoring developers, establishing code-review and CI/CD standards, and shipping polished interfaces for clients across the UAE, Denmark, and the United States.

TECHNICAL SKILLS

Core Frontend: React.js, TypeScript, JavaScript (ES6+), React Native, Next.js, Redux, Vue.js, HTML5, CSS3

UI & Styling: Tailwind CSS, Responsive Design, Component Libraries, Design Systems, Cross-Browser Compatibility, Accessibility

Architecture & Performance: Component-Driven Architecture, State Management, Code Splitting, Lazy Loading, Rendering Optimization, Reusable Component Design

Frontend Engineering: REST & GraphQL Integration, API Design, Authentication (OAuth, Firebase), Unit & Integration Testing, Debugging

Backend & Data: Node.js, Express.js, Ruby on Rails, GraphQL, MongoDB, PostgreSQL, Firebase

Tooling & DevOps: Git/GitHub, Docker, CI/CD, Webpack, Jira, Confluence, Linux

Leadership: Frontend Leadership, Team Mentoring, Code Review, Architecture Decisions, Sprint Planning, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer / Frontend Lead | DevAndGo | United Arab Emirates (Remote)

June 2021 - Present

- Lead frontend architecture and delivery for Crawlbase, a commercial web-data API platform, directing a team of 3 engineers and owning code quality across the codebase.
- Architect component-driven React and TypeScript interfaces, establishing reusable component patterns and a consistent design system that accelerated feature development.
- Drive frontend performance improvements through code splitting, lazy loading, and rendering optimization, improving load times on data-heavy dashboards.
- Build full-stack features end to end using React, Node.js, Ruby on Rails, and GraphQL, integrating REST/GraphQL APIs with polished, responsive UI.
- Established code-review standards and Docker-based CI/CD pipelines, reducing production defects and shortening release cycles.
- Mentor junior and mid-level engineers through pair programming, architecture guidance, and structured feedback.

React Native Developer | MeeW World | Copenhagen, Denmark (Remote)

May 2020 - May 2021

- Developed cross-platform mobile features in React Native within a distributed, remote-first European team on two-week Agile sprints.
- Built reusable components and integrated Firebase and GraphQL services, improving code maintainability and reducing duplication.
- Optimized mobile rendering and app performance, collaborating with product and design to ship polished, on-schedule releases.

Full Stack JavaScript Developer | Panacloud | Karachi, Pakistan

November 2017 - April 2020

- Developed responsive web and hybrid mobile applications with React.js, Vue.js, and React Native across multiple client projects.
- Built reusable UI components and integrated third-party services including Google OAuth, Firebase Authentication, and payment gateways.

- Diagnosed and resolved production defects, improving application stability and frontend reliability.

Freelance Frontend Developer | Upwork & Fiverr | Remote

April 2017 - January 2021

- Delivered 25+ React.js, React Native, and GraphQL projects for international clients across the US, Europe, and the Middle East.
- Owned the full frontend lifecycle from requirements to deployment, earning repeat engagements through quality and reliability.

KEY PROJECTS

Crawlbase - Frontend Lead (crawlbase.com)

- Web-data API platform. Led frontend architecture and shipped customer-facing dashboard features in React, TypeScript, and Ruby on Rails.

Autonomiq - Test Automation Platform (autonomiq.io)

- Built React interfaces and Node.js services for an AI-driven test automation tool, covering test creation and reporting UIs.

SubtitleBee - Automated Subtitling (subtitlebee.com)

- Developed frontend and API features for an automated video subtitling product used by content creators.

EonVPN - VPN Application (eonvpn.com)

- Built cross-platform application UI with React Native and supporting backend services.

EDUCATION

Bachelor of Science, International Relations

Federal Urdu University, Karachi, Pakistan | 2019

Certification, Web and Mobile Application Development

Memon Federation, Karachi, Pakistan | 2017
